

Hanafuda Cards

## Samples of Nintendo hanafuda

On this double page are samples of regional *hanafuda*. In the manner of modern cards, illustrations could be changed and adapted according to periods and taste. On the right hand side of this page, you can see a selection of different illustrations of Nintendo packs throughout their history.

These Daiji variants, mainly used in the Kyūshū and Shikoku provinces, are easily recognisable owing to their avant-garde illustrations.

Amongst regional hanafuda, the *Echigo Hana* are worthy of note. Mainly used in the Niigata province, their unique trait comes from calligraphed poems, which make them akin to Hyakunin Isshu cards.
